

① Here's short JDBC program to connect to an oracle database named college with exception

handling:

code:

```
import java.sql.*;
```

```
public class OracleJDBC {
```

```
    public static void main (String[] args) {
```

```
        try (Connection c = DriverManager.getConnection
```

```
            ("url", "username", "password")) {
```

```
            System.out.println ("connected to oracle BD");
```

```
        }
```

```
    } catch (SQLException e) {
```

```
        System.out.println ("connection failed");
```

```
    }
```

```
}
```
